WORKING EXPERIENCE

Drylab

Member of Technical Staff

- Building an AI-automated bioinformatics platform that handles end-to-end research workflows for life science teams — from data search and analysis to model training.
- Contributing to the development of an enterprise-grade platform that empowers leading labs to accelerate their discovery phase.

Ho Chi Minh City, Vietnam

Oct 2025 - Present

VPBank

DevOps Engineer

- Youngest Senior Specialist at @VPBank. (21 years old)
- Aligning ESB architecture with microservices and cloud environments, focusing on stability, performance, and scalability.
- Utilizing GitOps framework to automate monitoring, enabling proactive management and real-time issue resolution.
- Re-architecting existing APIs and services to integrate with modern microservices and message-oriented middleware (IBM MQ).
- Designing and implementing CI/CD pipelines to streamline deployment and testing, ensuring smooth integration and delivery of new features.

Hanoi, Vietnam

Aug 2024 - Sep 2025

OpenCommerce Group

Full-Stack Developer

- Participate in the development of the Dropshipping e-commerce system.
- Enhance and develop payment and related systems using Golang and VueJS. Integrate with payment services such as Stripe, PayPal, and others.

Hanoi, Vietnam

Mar 2024 - July 2024

FUNiX xSeries

Fullstack Developer & Program Development Officer

- Contributed to the development of internal applications, including the Mentoring System and Learning Management System (LMS). Managed cloud-based resources for the entire team, ensuring efficient and secure access to the necessary tools and resources.
- Assumed responsibility for designing and developing xSeries specialized courses, including Full Stack with MERN Stack, Data Engineering, Cloud Computing, and DevOps, ...

Hanoi, Vietnam

Aug 2021 - Feb 2024

FPT Software

Backend Developer

- Balanced my role as a part-time employee while still attending high school, gaining valuable work experience while completing my education.
- Contributed to the development of internal applications, including the Mentoring System and Learning Management System (LMS).

Hanoi, Vietnam

Aug 2020 - Aug 2021

FUNiX's IT department

Backend Developer

- Started working immediately after my first year of university, at the age of 17, gaining valuable experience and skills while pursuing my education.
- Developed a learning tool and management software using Javascript, NodeJS, and Firebase, providing an interactive and user-friendly platform for students and instructors.

Hanoi, Vietnam

Aug 2019 - Aug 2020

EDUCATION

FPT University

- Major: Software Engineering.
- Graduated at the **age of 20**, two years ahead of schedule.
- Awarded a full scholarship covering the entirety of the study period.

Hanoi, Vietnam

Jan 2022 - Aug 2023

FUNiX University

- Major: Software Engineering.
- Started studying at the **age of 16**.
- Received a scholarship each semester and actively participated in various university activities.

Hanoi, Vietnam

Aug 2018 - Dec 2022

PROJECTS

Real-Time Likelihood Engine for Personalized Financial Product Recommendations

Fullstack Developer & DevOps Engineer & Tech Lead

- An AI-driven real-time likelihood engine that predicts a customer's propensity to engage with financial products based on behavioral and profile data. Integrated with the Intelligent Banking Agent System, it enables personalized recommendations, automated model training, and continuous optimization to boost engagement and conversion rates.

Vietnam

Jun 2025

- Technologies: ReactJS, LangGraph, GoLang, AWS.

Autonomous Insight & Action Pipeline for Hospital Data

Vietnam

Fullstack Developer & DevOps Engineer & Tech Lead

Oct 2024

- An AI-powered system that analyzes hospital data to detect issues, extract insights, and suggest actions — just like a virtual data analyst.
- This pipeline helps hospitals analyze both patient data and staff feedback. It detects unusual trends, visualizes patterns, and summarizes open-text responses. Hospital staff can ask questions in natural language, and the system will auto-generate answers, charts, or queries to support decision-making.
- Technologies: ReactJS, LangGraph, GoLang, AWS.

Architecture Design Generator

Vietnam

Fullstack Developer & DevOps Engineer & Tech Lead

Jun 2024

- Champion of **VPBank Hackathon 2024**.
- An application designed to provide various functionalities to help users create and manage architecture design diagrams more effectively. With the power of ChatGPT 4, our application can provide users the ability to create architecture design from scratch with a more interactive and user-friendly experience.
- Technologies: ReactJS, LangGraph, GoLang, AWS.

Shopee Product Crawler

Vietnam

Data Engineer

Apr 2023 - Aug 2023

- A specialized tool for crawling products on Shopee by shop, keyword, and other criteria, with a continuous update mechanism to keep data current.
- Collects comprehensive information, including product details, images, and comments, enabling dataset creation for search functionality, data analysis (DA), and AI model training.
- Achieved a dataset of 1 million fashion products, and 8 million images from over 8,000 shops on Shopee, supporting scalable data-driven insights and AI applications.
- Technologies: Selenium, Python, ...

E-commerce Template Base Crawler

Vietnam

Fullstack Developer & Data Engineer

Apr 2023 - Aug 2023

- Building a crawler cluster that gathers e-commerce product data from various sources, brands, and shops. It uses XPath templates to extract product details such as name, price, and images, with continuous update mechanisms.
- Provides an end-to-end experience: includes a tool for creating templates, a web app for managing crawled data and crawl history, and a dynamic core crawler system.
- Users only need to create a template for a sample product link on the website, and the system will automatically crawl all related products based on the generated template.
- Technologies: Selenium, ReactJS, NodeJS, Python, ...

FinAlnce Assistant

Vietnam

Fullstack Developer & DevOps Engineer & Tech Lead

Apr 2023 - May 2023

- FinAlnce Assistant** is a financial chatbot designed to provide various functionalities to help users manage their finances more effectively. With the power of ChatGPT, our chatbot predicts user behavior, automates basic tasks, and offers real-time financial insights.
- Champion of FUNiX ChatGPT Hackathon.
- Technologies: ReactJS, Flask, GPC Cloud, Firebase, LangChain.

AWARDS

- Champion of **VPBank Hackathon 2024**.
- Champion of **FUNiX ChatGPT Hackathon**.
- Runner up of **Hack CX Together 2025**.
- Runner up of **NRC x FPT Hackathon 2024**.
- Third Prize of **FPT Edu Resfest 2023**.
- Third Prize of **FPT Edu Hackathon 2021: Using AI for image recognition**.
- Third Prize of **FPT Edu Hackathon 2019: Make it happen**.

CERTIFICATES

- AWS Certified Solutions Architect - Associate by AWS.
- AWS Certified Cloud Practitioner by AWS.
- AWS Academy Certified Educator by AWS.
- 30+ Certificates from Udemy and other MOOC platforms.

ACTIVITIES

Bootcamp Cloud Practitioner FUNiX - AWS

Vietnam

Major instructor

Sep 2022

- Authorized AWS Academy Educator.
- Selected as a lecturer for the AWS Academy Cloud Training Bootcamp in Vietnam, organized by FUNiX and AWS Academy, where I shared my knowledge and experience in the field of cloud computing with students.
- Assumed responsibility for instructing an AWS Cloud Foundation course, with a class size of nearly 800 students, delivering comprehensive and engaging lessons on the fundamentals of cloud computing.

FUNiX Mentor

Mentor

Vietnam

Sep 2022 - Present

- Assisted in providing answers to students' inquiries regarding FUNiX subjects, with a focus on information technology and soft skills, ensuring that their academic and technical queries are resolved.
- Participated in the evaluation process, administering exams to assess students' competence and readiness to complete the course, ensuring that they possess the required knowledge and skills.

OTHER SKILLS

- **Languages:** English | Vietnamese: native.
- **Programming languages:** JavaScript, Python, Bash Script, SQL.
- **Frameworks & libraries:** NextJS, MERN Stack, ReactJS, Django.
- **Other tools:** Linux, Git, Docker, AWS, k8s,
